

Life is Changing by Jerry W. Martin

August 8, 2020

(Repeat chords pattern for verses and chorus. Chorus is indented.)

A Driving through the city. **G A** Masked people everywhere I go
They all seem like bandits stand six feet away, they know
E F E F G A
Staring out of the window City streets, a lonely place to go

A G Life is changing **E F G A** Staying safe we will survive **A G** Life is changing
Life is changing Pray to God and we will thrive

Stepping out to a restaurant. Smiling faces I used to see
Got a throwaway menu. A small book is what it used to be
Standing at a distance. One page is all they handed me

Life is changing Staying safe we will survive Life is changing
Life is changing Pray to God and we will thrive

I used to work in a high-rise. Glass windows, what a sight to see
People sitting next to me, every day is how it used to be
Traffic jams every day, now I work from home to stay

Life is changing Staying safe we will survive Life is changing
Life is changing Pray to God and we will thrive

Called to see my doctor. A tele-visit is all I need
He appears on the small screen. Masked up like he's a foot from me
Can't check my heartbeat or know if I can even breath

Life is changing Staying safe we will survive Life is changing
Life is changing Pray to God and we will thrive
Life is changing Life is changing
